

Mortar/Plaster Mixer

The Ultimate
Low Maintenance

Mortar / Plaster
Mixer

- **Proven tough in years of rough on-the-job performance.**

Hydraulics have for years lightened many tasks... dumping a truck bed, steering, even helping stop the truck, and now in mixers too! The Hydra-Flow mixers have this advanced design and complementing quality components; like sealed tub bearings and grease-able tub seals. With just minimal care, the tub bearings will last and last.

Here's hydraulic muscle to mix forward or in reverse directions... on gas, diesel or electric power.

It's years on-the-job have proven these mixers to be a smart business decision for their owners... and they'll prove it to you too!

- **Hinged cowl eases access**

All Hydra-Flow mixers feature a swing-away cowl to help speed up what little maintenance there is.

- **All-new Hydraulic drive system is a real maintenance-miser!**

What they **don't** have is their best feature. No gear boxes! No drive belts! No clutches! Virtually nothing to jam up. What they do have is a very simple, very smooth performing hydraulic system.

- **Hydraulics eliminate a mixer's biggest problem.**

They get stuck. Jam up on a stone. Break a shear pin, or worse, something else. But either way, it stops your construction. But when a new Hydra-Flow mixer hits a stone, a unique by-pass system prevents any damage to the mixer. Your operator frees the blades by simply reversing direction. Instantly the unit is ready to continue mixing... without any time and profit consuming repairs. The interruption last only seconds! It's that fast and easy on your operator... and mixer.

Mortar/Plaster Mixer

Unique hydraulic-drive mixers perform - on the job... on the books...

One's right for your job.

General Specifications

Ruggedly built for years of dependable running and running and running.

- 10, 13, & 16 cubic foot tub capacities
- Sealed tub bearings.
- Grease-able tub seals.
- Heavy-gauge steel drum to minimize bumps, dents and hold up against constant wear and tear.
- Heavy-gauge mixing blades.
- Optional Hydraulic Dump
- Heavy-gauge, one-piece steel cowl to protect engine and hydraulic system.
- Heavy-duty square tube steel frame.
- Tub locks for safe towing.
- Detachable Tow bar.
- Ball hitch available.
- 15" tires and wheels.
- Gas engines (Honda & Vanguard)
- Diesel engines (Hatz, Kohler & Kubota)
- Electric motors (220V Single Phase & Three Phase)

Model	Capacity	Description	Power Option
1000HT	10 Cu. Ft.	Tow-able	13 HP Honda
1300HT	13 Cu. Ft.	Tow-able	13 HP Honda
1300HS	13 Cu. Ft.	Skid	13 HP Honda
1300VS/SP	13 Cu. Ft.	Skid L.H. Dump	18 HP Vanguard
1600VT	16 Cu. Ft.	Tow-able	18 HP Vanguard
1600VS	16 Cu. Ft.	Skid	18 HP Vanguard
1600VS/SP	16 Cu. Ft.	Skid L.H. Dump	18 HP Vanguard
